1. Introduction

Welcome to the Recipe Application! This application allows you to manage your recipes efficiently by adding, viewing, and scaling recipes. Follow this user manual to get started.

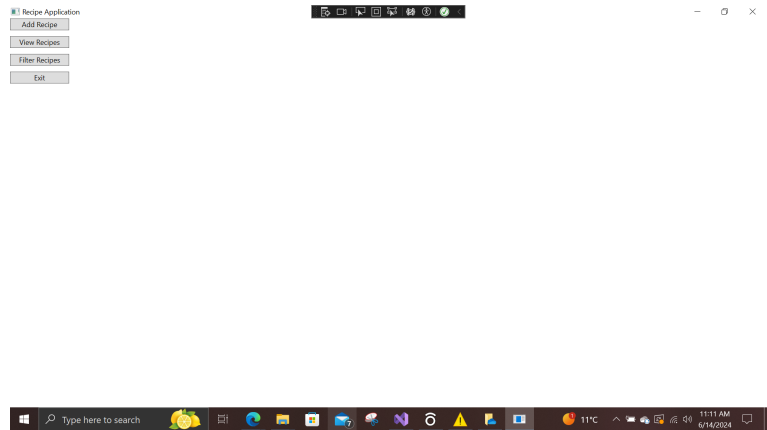

2. Installation

1. Download the Recipe Application installer from the official website.
2. Run the installer and follow the on-screen instructions.
3. Once installed, launch the application from your desktop or start menu.

3. Main Window

Adding a New Recipe

- 1. Open the application.
- 2. Click on the "Add Recipe" button.

3. Main Window (continued)

Viewing Saved Recipes

- 1. Click on the "View Recipes" button to see all your recipes.
- 2. Recipes are listed with their total calorie count.

Exiting the Application

- 1. Click the "Exit" button to close the application.

4. Recipe Management

Adding Ingredients and Steps

- 1. In the Add Recipe window, enter the recipe name.
- 2. Click "Add Ingredient" to input ingredients, including name, quantity, unit, calories, and food group.
- 3. Click "Add Step" to describe each step in the recipe.

Scaling and Resetting Recipes

- 1. To scale a recipe, enter a scaling factor and click "Scale Recipe."
- 2. To reset the recipe to its original quantities, click "Reset Recipe."

5. Viewing Recipes

Navigating to the Main Window

- 1. From the View Recipes window, click the "Back to Main" button to return to the main window.

6. Input Validation

- Ensure quantities and scaling factors are greater than zero.
- Enter valid food groups to avoid errors.

7. Event Notifications

- The application will notify you if the total calories of a recipe exceed 300.

8. Troubleshooting

Common Issues

- **Error: "Unknown build error, 'Could not find file...'"** Ensure all necessary files are in the correct directory.
- **Error: "Type or namespace name could not be found"** Check if all using directives are correct and necessary references are included.
